

# OKOLO NATHAN CHINEDU

## Senior Backend / Full Stack Software Engineer

Enugu, Nigeria (Open to Remote & Relocation) | +234 813 334 6628 | okolonathanchinedu@gmail.com  
GitHub | LinkedIn

### PROFESSIONAL SUMMARY

Full Stack Software Engineer with over four years of professional experience designing, building, and deploying scalable backend systems, fintech platforms, AI-enabled applications, and cloud-based web solutions. Experienced across the full software development lifecycle, from architecture and API design to deployment, performance optimization, and production support.

Specialized in modern software engineering practices. Proven track record delivering secure financial systems, payment automation platforms, RESTful APIs, and microservice architectures used in production environments.

Passionate about solving complex engineering problems, mentoring developers, building products from concept to production, and leveraging AI-assisted development tools to improve engineering productivity. Open to international relocation and distributed engineering teams.

### TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Python, SQL, Solidity, Rust (working knowledge)

**Backend:** Node.js, Express.js, REST API design, microservices, JWT, OAuth, payment gateway integration, background jobs, Redis, event-driven systems

**Frontend:** React, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Redux, Context API

**Databases:** MongoDB, PostgreSQL, Redis

**Cloud & DevOps:** AWS, Docker, GitHub Actions, Nginx, PM2, Vercel, Railway, Cloudflare, Linux, Bash, SSH, Git

**AI & Automation:** AI-assisted development, Cursor, GitHub Copilot, ChatGPT, Claude, automation workflows, data-processing pipelines, Claude

**Engineering Practices:** Agile (Scrum), CI/CD, system design, API design, software architecture, technical mentorship, performance and database optimization, code reviews

### PROFESSIONAL EXPERIENCE

#### MAJ FinTech — Backend Software Engineer

January 2023 – Present

Develop and maintain backend services powering a fintech ecosystem for cooperative societies, digital financial services, payment automation, and member management.

- Designed and developed scalable backend services using Node.js and TypeScript.
- Built RESTful APIs for savings, loans, wallets, contribution payments, registration workflows, and member onboarding.
- Engineered direct-debit processing, scheduled payment execution, transaction reconciliation, and recurring payment reminders.

- Designed a microservice-based payment infrastructure using PostgreSQL for secure financial transactions.
- Optimized MongoDB and PostgreSQL queries and implemented caching strategies for large cooperative datasets.
- Collaborated with frontend, QA, and product teams in Agile delivery cycles; performed security reviews, code reviews, and production incident resolution.

**Technologies:** Node.js, TypeScript, MongoDB, PostgreSQL, Redis, Docker, AWS, GitHub Actions, Git, REST APIs.

### **Appknox (Remote) - Backend Developer**

March 2021

- Integrated real-time customer support systems into production applications.
- Developed backend endpoints supporting new application features.
- Collaborated with UI/UX and QA teams during feature delivery.

### **Genesys Tech Hub — Software Developer**

June 2020 – March 2021

- Developed React applications and HR management modules.
- Led frontend implementation for internal products and participated in Agile software delivery.
- Mentored junior developers.

### **Afrange Cleaning Services — Software Developer (Contract)**

April 2021 – July 2021

Designed and developed backend services supporting customer bookings and online service management.

## **LEADERSHIP & MENTORSHIP**

### **Learnable — Backend Mentor**

2022 – Present

Mentor aspiring software engineers in backend development, API design, databases, Git, and software engineering best practices.

### **Upskill Internship — Backend Mentor**

2022 – Present

Provide technical coaching, project guidance, architecture reviews, and career mentorship.

### **Girl Tech Magic — Backend Mentor (Volunteer)**

2022 – 2023

Mentored young women entering software engineering through practical backend development projects.

### **Coal City University — Graduate Assistant / Lecturer Assistant**

2020 – 2023

Delivered tutorials in Mathematics and Statistics while mentoring undergraduate students in analytical thinking and problem solving.

## **PROJECTS**

## Akilaah

A fintech platform for cooperative societies providing member management, savings, loans, contributions, wallets, payment automation, and direct-debit processing.

**Responsibilities:** Backend architecture, payment engine, loan management, member services, microservices, PostgreSQL payment service

**Technologies:** Node.js, TypeScript, MongoDB, PostgreSQL, REST APIs

## Axis Link

Web3 social networking platform inspired by Twitter.

**Responsibilities:** Backend architecture, authentication, Docker deployment, smart contract integration, infrastructure management

**Technologies:** Node.js, TypeScript, MongoDB, Docker, IPFS, Web3.js

## VOBB

International student application management platform supporting agencies and sub-agents.

**Technologies:** Node.js, TypeScript, MongoDB

## WebCop

Enterprise web compliance platform for GDPR, SSL, cookies, and legal document generation.

**Technologies:** Next.js, React, JavaScript

## AlgoExchange

Centralized cryptocurrency exchange built on Algorand.

**Technologies:** React, Tatum API, JavaScript

## Wave Portal

Ethereum decentralized application built using Solidity and React.

**Technologies:** Solidity, React, Web3.js

## Resource Edge

Human resource management platform supporting onboarding, employee management, and leave administration.

## EDUCATION

### University of Nigeria, Nsukka

Bachelor of Science (B.Sc.), Mathematics | 2015 – 2019

**Final Year Project:** Application of Sigmoid Function to Machine Learning

## CERTIFICATIONS

- Innovation and Entrepreneurship for Higher Education — British Council
- Lincoln International Business School — Career Management, Leadership & Entrepreneurship
- TxE Summit — Certificate of Recognition
- Genesys Learnable Mentorship Recognition (2022–2024)
- Upskill Program Mentorship Recognition

## COMMUNITY LEADERSHIP

- Backend Mentor — Learnable
- Backend Mentor — Upskill Internship
- Volunteer Mentor — Girl Tech Magic
- Head of ICT & Facility Management — TxE Summit
- Founder Coal City University Tech Club

## SELECTED ACHIEVEMENTS

- Built production fintech systems supporting digital savings, loans, contributions, wallets, and payment automation.
- Designed scalable microservice architectures for secure financial transaction processing.
- Developed AI-enabled backend systems supporting automation and intelligent workflows.
- Mentored software engineers across multiple national technology programs.
- Delivered software solutions spanning fintech, HRTech, AI, education, and Web3.
- Experienced in scalable API design, cloud deployment, database optimization, and modern software engineering practices.
